

# Protect our land, air and drinking water – YES on 40

*Many of California's wells don't meet safe drinking water standards. Prop 40 will clean up the lakes, rivers and streams that bring us clean drinking water.*

*Prop 40 helps protect farmland, open space, grazing lands and the watersheds that provide us with clean water.*

## Protect drinking water sources.

Prop 40 protects vital drinking water sources – our rivers, lakes, wells and reservoirs – from potential contamination by toxic pollutants. It also preserves the lands that provide us with clean water and protects our rivers and bays from polluted run-off.

---

**"Prop 40 improves air quality by replacing old diesel trucks and buses with cleaner vehicles and new pollution control equipment."**

*– American Lung Association of California*

---

## Tough fiscal safeguards.

Prop 40 is subject to strict accountability standards to ensure funds are properly spent, including independent annual audits. And, Prop 40 uses existing state revenues – it won't increase taxes or create any new taxes. It's a safe, smart investment that takes advantage of today's low interest rates.

---

**"Prop 40 fulfills our responsibility to protect California's resources for our children, grandchildren and future generations."**

*– Congress of California Seniors*

---

## Invest in our state for future generations.

Prop 40 carefully balances efforts to protect our land, air and water resources with strengthening the state's economy. Prop 40 represents a smart investment in our future. Now is the best time to invest in clean water, clean air and the natural resources that enhance our quality of life.
